EDUCATION

Bachelor of Engineering, Artificial Intelligence & Data Science Expected May 2027
Marathwada Mitra Mandal's College of Engineering (MMCOE), Savitribai Phule Pune University **CGPA: 8.3 / 10**

EXPERIENCE

Software Engineering Intern | ArrayPointer, Pune Jan 2026 – Jul 2026

Meet – Multi-Tenant Meeting Intelligence SaaS (meet.arraypointer.com) Apr 2026 – Jul 2026

- Built the **React + TypeScript** frontend (**Vite**, **Tailwind CSS**, **React Router**) for a production **multi-tenant SaaS**, covering organisation dashboards, session history, shared analysis views and invite flows, with state managed through the **Context API** and **custom hooks**.
- Engineered **in-browser meeting recording** with the **WebAudio API** and a chunk-streaming upload pipeline supporting pause/resume and zero data loss.
- Developed the **Node.js/Express** backend: a multi-tenant **PostgreSQL** schema and **25+ REST APIs** for recording, organisation management, analytics and super-admin workflows, with secure sign-in and rate limiting.
- Delivered AI-generated transcripts, summaries and action items via AWS S3 and Lambda, and deployed the app to production with Docker and Nginx.

ThinkForge – Adaptive Learning Platform Jan 2026 – Mar 2026

- Built a **Next.js + TypeScript Progressive Web App (PWA)** styled with **Tailwind CSS** that serves one adaptive aptitude question daily, adjusting difficulty with a Bloom's Taxonomy-based skill-tracking algorithm.
- Developed **Next.js API routes** with **Zod** validation and **PostgreSQL**, integrating the **Claude API** to evaluate free-text answers and reasoning, with Redis for spaced-repetition and session state.
- Implemented user authentication and push notifications, and shipped the app to production on **Vercel**.

PROJECTS

KalaSetu – Voice-First AI Cataloguing Platform for Artisans | *Smart India Hackathon 2026* Sep 2026 – Present

- Building a platform that turns a phone photo and regional-language speech into a bilingual (Hindi/English), priced, shareable e-commerce listing for low-literacy Indian artisans.
- Developed the **Flutter** mobile app across the full listing flow (language, onboarding, capture, AI insights, approval, distribution) with **GoRouter** navigation, **Provider** state management and **23-language** support.
- Integrated the app with the **FastAPI** backend through **REST APIs** for voice cataloguing (Sarvam speech-to-text and text-to-speech, Google Gemini), AI price suggestions and an image studio that removes backgrounds using ISNet and runs a colour-accuracy check.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, C++, SQL

Frontend: React, Next.js, React Router, Context API, Tailwind CSS, Vite, Axios, GSAP, Three.js, HTML5, CSS3, Responsive Design

Mobile: Flutter, React Native (Expo)

Backend: Node.js, Express.js, FastAPI, REST API Design, Next.js API Routes, Zod, API Testing (Vitest, Supertest)

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Tools & Platforms: GitHub, GitLab, Vercel, Postman

AI / ML: Machine Learning, LLM Integration (Claude, Gemini), Computer Vision (ViT, ISNet), Speech AI (Sarvam), HuggingFace

Big Data: Apache Hadoop, MapReduce, Apache Hive, PySpark

ACHIEVEMENTS & LEADERSHIP

- Smart India Hackathon:** participant in 2024, 2025 and 2026.
- Technical Head, AESA MMCOE:** organised department technical events and mentored juniors on project development.
- Certification:** Full-Stack Web Development Bootcamp (Udemy).
